## ***The beauty of Quantum Physics...***

*has always fascinated me and is so essential if we want to become the creators of our life and find new creative ideas in our work. We can learn to collaborate with the quantum field filled with infinite possibilities!*

*My painting COSMIC DANCE 65x92cm*

*This painting is inspired by the book of GARY ZUKAV "THE DANCING WULI-MASTERS", where he explains the quantum physics to a larger public. A book I love, together with "THE TAO OF PHYSICS" of Capra.*

As an artist, already as a teenager, I always loved to read and learn about new discoveries in science. It gave me so much freedom to understand that on this level of reality, everything is energy and information. Everything is from the beginning just possibilities that become activated by our thoughts and visualizations, our intentions and expectations...to then manifest in our world. We are here the creators of everything! Isn't that a huge discovery and then to deeply understand what that means?

Perhaps we can't?

To understand that we are not victims of the world around us. We are actors. If we learn not to "re-act" to the world but start to "act" instead, with our own inner power, we become the co-creator of reality.

The quantum field is intelligent. It penetrates everything and it is the source of everything. It has no material aspect, just possibilities to become something, to manifest something.

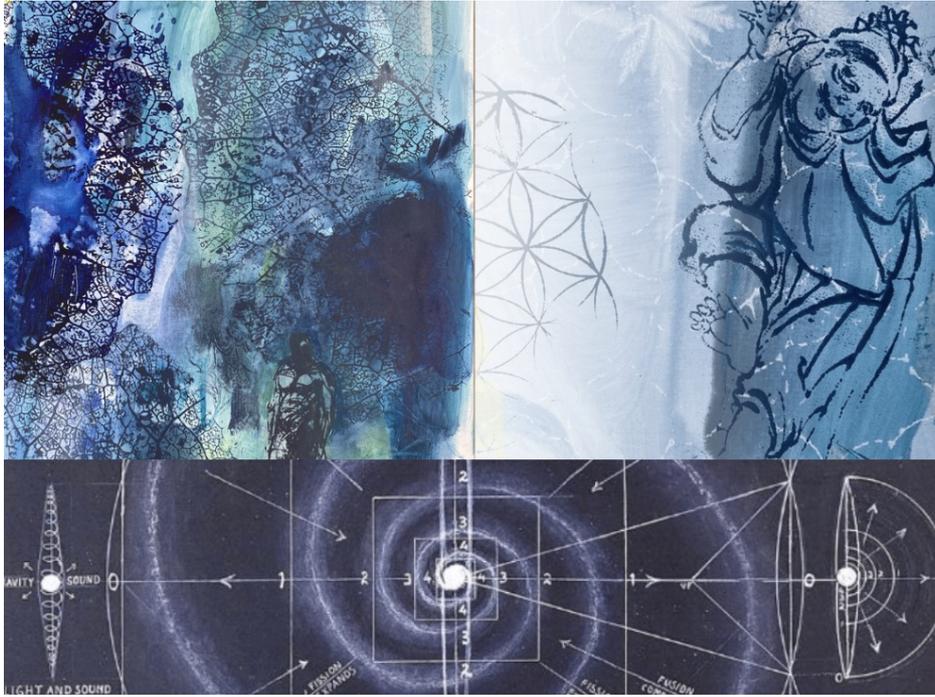

Many scientists don't like it at all. You can't explain the outcome of an experience, you can't explain its consistency and you can never control it. Here only vibrations and energy exist. That is what our reality is made of.

Everything is vibrations.  
Vibrations and intelligence...

I am creating a Masterclass for free to introduce you into this beautiful world beyond the veil of our reality. It is all about "The art of living" by art, poetry and science.

Soon I will share it so please subscribe on my website to be sure to reserve your seat if you haven't already done that. ☐
